DETAILED ACTION

Allowable Subject Matter

1. Claims 1-5,7-49,51-59 are allowed. The following is an examiner's statement of reasons for allowance:

Claim 1: The prior art fails to teach or make obvious a method of reducing noise comprising the combination of: initializing profile parameters based on a current turn off instant; determining a desired torque; initializing a radial force rate of change parameter related to the current turn-off profile and updating the radial force rate of change parameter if the desired torque is not achieved.

Claims 2, 18,22,37: The prior art fails to teach or make obvious a method or apparatus comprising the combination of: updating a profile parameter if the first performance criterion is not satisfied; and automatically adjusting a profile parameter by predetermined increments.

Claims 26,41: The prior art fails to teach or make obvious a switched reluctance system comprising the combination of: a current turn off instant and a current turn off profile defining a desired decay of the magnitude of the phase current from the turn off instant to zero, the desired decay being less rapid than a natural decay of the phase current.

Claim 49: The prior art fails to teach or make obvious a switched reluctance system comprising: a neural network receiving a current profile comprising a current turn off instant and a current turn off profile defining a desired decay of the magnitude of

the phase current from the turn off instant to zero, the desired decay being less rapid than a natural decay of the phase current.

Claims 3-5,7-17,19-21,23-25,27-36,38-40,42-48, 51-59: The claims depend from the above-mentioned allowable claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
